

NEW

the new **COMPACT LENS DRIVE** 12V, 0.5A max.

Small Size

the small size is perfect for use on a polecam. this was ensured through the development process

Easy Use

the two motors can be adjusted longitudinally by loosening the screw on the bottom; for easy lens change, the motors can easily be pivoted from the lens gear

with it's unique design the lens drive is just as big as the camera-head itself

the gap between the pinion and the driven gear is also adjustable with a lockable eccentric tappet.

Clamp Gear Wheel
modul 0.5 / 33mm diameter
(Kowa 10M 5, 8.5, 12, 16, 25, 35mm)

Y-Lens Drive Cable
